

Look how BLUE does GREEN!

March 5, 2010

To whom it may concern:

This letter is designed to share a bit about Fleet Solutions and their Network Fleet GPS Tracking system and how it has helped us at Western Nevada Supply.

We currently have 50 units on line. Our company and our vehicles are spread all across Northern Nevada and Northern California.

Network Fleets system is a very good system. We get the kind of data we need that has greatly assisted in cost savings and overall efficiencies.

If you asked me to pinpoint a single advantage with Fleet Solutions, I will tell you it is their service. These people are very responsive. Anytime we have an issue, concern, or question they are on it immediately. That, we really appreciate.

There are a number of systems out in the market place. There is only one company that backs it up with their customer service...and that is Fleet Solutions.

Sincerely,

Aaron Blackwell
