

# Improving Road Safety

## *Drivewyze Safety Notifications*

North America's largest weigh station bypass service has grown to become North America's largest commercial vehicle safety network.

We are proud to introduce Drivewyze Safety Notifications. You can get notifications for Rollover Zones, Low Bridges, Steep Grades, Runaway Ramps, Brake Check Areas, Weight Restrictions, Work Zones, High Collision Zones and more. This free service is available to all Drivewyze fleets and is integrated into your existing telematics device.

### *How does it work?*

- *Drivers see alerts for upcoming high-risk areas on the road*
- *Reduces over speeding in risk areas*
- *Safety data added to the fleet's existing monthly bypass report*

# DRIVEWYZE SAFETY NOTIFICATIONS ARE A WIN-WIN-WIN

## Drivers

Drivewyze Safety Notifications reduce the stress and risk of driving on unfamiliar roads.

## Fleets

Get insight into driver behavior before and after the notification, helping to improve safety score.

## Law Enforcement

Law Enforcement and state agencies benefit from an overall improvement in driving safety.

Proven to reduce driving speed  
& improve driving behavior.

Prevent high-cost bridge collisions in high CMV-traffic areas.

Decrease risky driving behaviour on difficult terrain.

## Proven Safety Improvement Tool

Through partnership with fleet safety leader J.B. Hunt Transportation, Inc., Drivewyze has tested and proven the effectiveness of safety notifications in changing driver behavior.

The long term study involved 15,000 trucks, in which groups of drivers were shown notifications in advance of high-rollover locations.

The results showed that even in the presence of physical road signs, in-cab driver notifications further reduced unsafe driving.

**17%** reduction in  
instances of speeding

A proven driver safety improvement tool means **saved lives**

Fleet-wide improvements to driver safety result in **reduced recovery costs**

Drivers get notifications at over **2,500** high-risk locations nationwide
